Hi Anna,

This is [REDACTED]. I have been meaning to follow up with you. We met in early June in the Admission office as my friend and I were visiting campus from California while we were out on the East Coast for our friend's wedding. You had given me resources for the Biomedical Graduate Education program and the Math/Stats Graduate program along with the contact information for Dr. [REDACTED].

After our meeting, I called Dr. [REDACTED] and met with him that afternoon to learn more about the Math/Stats program. During the meeting with Dr. Shaw, he extended the opportunity to begin courses this Fall. Quite an unexpected offer! After a few weeks of weighing this option and communicating about the logistics with Dr. [REDACTED], I decided to proceed. Last minute life change! All that to say, the paperwork was processed through the graduate admissions office and made official last Friday.

I wanted to follow up and say THANK YOU so much for taking the time to meet with me and provide me with the proper resources that catalyzed this opportunity to continue my graduate education at Georgetown! Prior to my visit to the Admissions office, I had not readily considered the Math/Stats department. However, after speaking with you, learning more about the program, and your referral to Dr. [REDACTED], it has launched me into an exciting and unforeseen advancement in my graduate career. Dr. [REDACTED] has been beyond helpful during this transition period, which further validates when you mentioned how involved he is in assisting his students.

Although I have not set foot on campus yet as an official student, my experience thus far has been great! Your encouragement and readiness to help initiated a very positive impression of Georgetown, and I am excited to now be a student! Next step is to book that one way plane ticket from California to DC!

Thank you again!

Best,
[REDACTED]
